JUGNOO

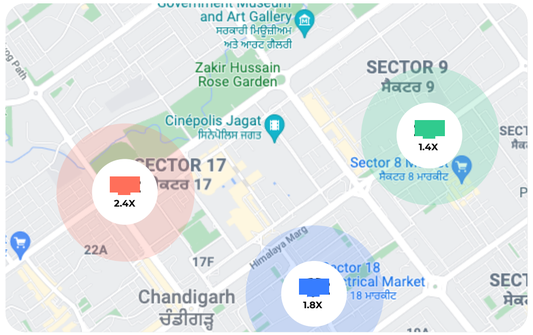
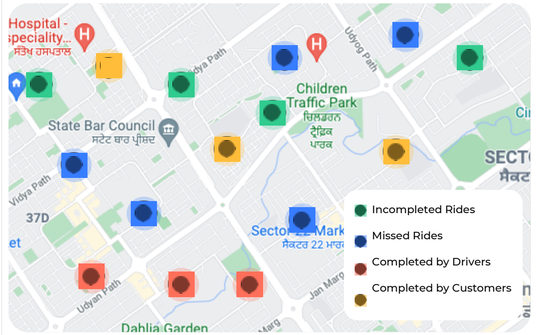
Advanced Features



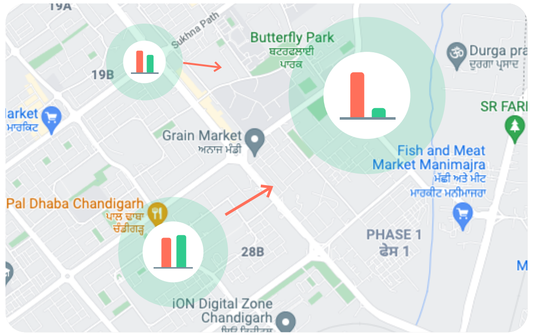
Uber Like Dynamic Pricing

Dynamic Pricing lets you set a surge at a particular geofence. Admin can set flexible prices based on current market demands from the admin panel.



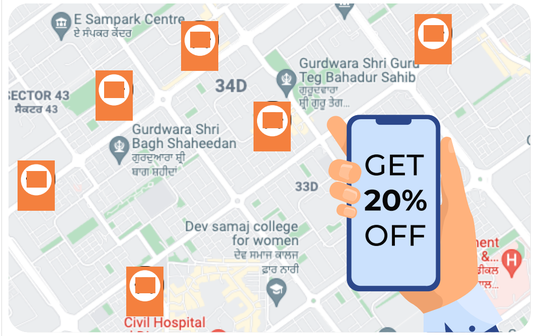
Geofencing

Admin can set a virtual perimeter with the help of a polygon to show the area in which he wants to be operational.



Manage Demand & Supply

Admin can dispatch the drivers from the admin panel to the area where there is more demand in order to match the demand and supply.



Data Analytics

Analytics provides various KPI graphs and reports to analyse and understand the business in a very intuitive and comprehensive format.

JUGNOO
